JHALAK SAINI

Java | Frontend Development | Automation

sainijhalak015@gmail.com +91-6395851946 Greater Noida, India sainijhalak sainijhalak

Summary

Results-driven Computer Science undergraduate with hands-on experience in frontend development, workflow automation, and AI API integration, with a strong foundation in Java. Proficient in React.js, HTML, CSS, JavaScript, and n8n. Built real-world projects using AI APIs, automated workflows, and database-backed web applications.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering *Aug 2023 – May 2027*
GL Bajaj Group of Institutions, Greater Noida, Uttar Pradesh, India
CGPA: 8.7/10.0

Class XII (Science – PCM)	*2023*	**92%**
Class X	*2021*	**95%**

Technical Skills

Programming Languages:	Java
Generative AI & LLMs:	Gemini API integration, prompt-driven chatbots
Frontend Development:	React.js, HTML5, CSS3, JavaScript
Backend & Databases:	REST APIs, SQLite, SpringBoot
Automation & APIs:	n8n, Webhooks, ElevenLabs, Twilio, OpenWeather API
Core CS Concepts:	Data Structures, Algorithms, OOP, DBMS
Tools & Platforms:	Git, GitHub

Projects

Vayalum – AI-Powered Farming Assistant *Jan 2025*
Tech Stack: Python, Streamlit, Gemini API, SQLite, OpenWeather API, Twilio

- Architected a full-stack AI farming assistant enabling farmers to access crop guidance, disease detection, and real-time weather data from a single platform, reducing dependence on delayed external advisory services.
- Integrated Gemini API (Generative AI/LLM) for a conversational chatbot and image-based plant disease detection, delivering actionable crop health insights.
- Implemented OpenWeather API to surface live weather conditions and alerts, and Twilio SMS to deliver critical farming notifications to users with limited internet access.

Equity Research News Analysis Chatbot *Jul 2026*
Tech Stack: Python, LangChain, OpenAI API, FAISS, Streamlit

- Developed an AI-powered chatbot to address information overload in equity research by enabling analysts to analyze multiple financial news articles and retrieve context-aware answers from URLs.
- Implemented RAG using LangChain, embeddings, and FAISS for semantic search and source-backed responses, supporting industry use cases in financial research, investment analysis, and news intelligence.

BookSphere – eBook Web Application *Nov 2024*
Tech Stack: Django, Python, HTML5, CSS3, JavaScript, SQLite

- Developed a full-stack web application enabling users to browse, search, and access a curated library of eBooks and learning resources through an organized and responsive interface.
- Built RESTful backend with Django handling authentication, resource management, and CRUD operations, with SQLite as the data persistence layer.
- Designed a clean, mobile-responsive frontend using HTML5, CSS3, and vanilla JavaScript to ensure a consistent user experience across devices.

Certifications

- **Oracle Agentic AI Certified Foundations Associate** – Oracle University 2026
- **CCNA: Introduction to Networks** – Cisco Networking Academy 2026
- **Junior Cybersecurity Analyst Career Path** – Cisco Networking Academy 2025
- **Web Development Certification** – Sheriyans Coding School 2025

Achievements

- Solved **400+ problems** on LeetCode, strengthening core Data Structures and Algorithms proficiency.
